

For new builds, our goal is to hide infrastructure either under the vehicles, or inside walls.

- Water tanks under vehicle
- Permanently mounted propane tanks under vehicle with fill ports for easy re-fills – no more removing tanks to re-fill
- Wiring inside walls makes cleaning easy and offers sleek, modern look

Customized features and design

- LED lighting inside and outside. Undercarriage colored lighting
- Lighted Belly boxes for storage
- Water inlet and shore power is placed behind locked access doors for safety
- Shore power for full operation and/or just night service keeping food cold over night
- Generators under vehicle for quiet operation, yet still accessible for maintenance
- Slide out options with drop down service window area for face-to-face customer interaction
- Alternate energy solutions: Solar, battery banks, propane generators, PTOs
- Audio and Video to include monitors for advertising or menus
- Specialized equipment: Pizza Brick ovens, Tortilla machines, Pizza Oven Stacks, etc.
- Customized solutions to balance energy sources for electrical and propane

Rolltechs Advantage
